

Addressing the Green Skills Agenda

Patricia Neden

CEO

Integrated Telecommunications

All qualifications include a sustainability element:

- wide range from work practices to design and implementation
- development of policies and procedures.

Green ICT

- describes the application of ICT to enable improved environmental efficiency across a range of business processes
 - Ex.) by teleconferencing meetings, an organisation reduces travel costs, improves productivity and lowers carbon emissions.

Printing and Graphic Arts

Core requirements expanded:

- to include endorsed environmental sustainability units from the Business Services Training Package at appropriate level.

Training and Education

- All qualifications allow for the importation of sustainability units.
- Additional unit added to elective pool for the Diploma; also operates as a skill set for VET professionals.
